In 1980, the previous owner, GSA Associates, spilled PCB-contaminated oil at the north end of the yard area, immediately east of an old loading dock. The new owners informed the Michigan Department of Natural Resources of their intent to clean up contaminants and dispose of contaminated soils, during a telephone conversation January 21, 1983. A hydrogeological investigation at the site was conducted by Environmental Research Group, Inc. in 1982, wherein they concluded that no PCB's were present in water from five monitoring wells on site. An inspection was conducted by Catherine Morse, MDNR Detroit District Office, on April 28, 1983.

An HRS evaluation and score was submitted to the EPA by Ecology and Environment, Inc. dated July 28, 1982.

At present, Petro-Chem Processing, Inc. operations are regulated under the provisions of RCRA.
